PROJECTS

Role: Angular Developer

Project Description: https://profitbet.com The website offers a complete range of online gaming products with the stronger focus on betting. It covers over 40,000 Live matches per month, offering game casts with direct-from-the-field detailed animations. With thousands of Live matches, profitbet offers realtime video streaming and voice commentary for real-time wagering and allows access to live scores and other match data. It makes betting very uncomplicated by offering many user-friendly features to its customers.

Technologies: Angular, JS, CSS

Role: Angular Developer

Project Description: https://webapp.stage-app.nl, http://stage-app.nl The website is a tool for seeing all the companies having internship opportunities through the map. The user can read the information about the company and available internship, can apply to the desired internship by filling the form. There is integrated Google map which shows where the company is located and how far it is from the users location.

Technologies: Angular 9

Integration: Google map, Stripe payment method, Restful APIs
